Executive Summary

Health System Overview
Marshfield Clinic was founded in 1916 by six physicians practicing in Marshfield, a rural central Wisconsin city. At its inception, Clinic founders saw research and education as critical to their practice of health care and that remains so today.

The Clinic became a 501(c)(3) nonprofit organization in 1992 and in 2014, Marshfield Clinic Health System (MCHS), Inc., was formed. The Health System’s mission is to enrich lives and create healthy communities through accessible, affordable, compassionate health care.

The Health System today is an integrated health system whose mission is to enrich lives through accessible, affordable compassionate health care. The Health System serves Wisconsin and Michigan's Upper Peninsula with more than 12,000 employees and 1,600 providers comprising 170 specialties, health plan, and research and education programs. Its entities provide service and health care to include more than two million residents through over 60 clinic locations, and 11 hospitals.

MCHS primary operations include: Marshfield Clinic; Marshfield Medical Center hospitals in Marshfield, Eau Claire, Beaver Dam, Park Falls, Ladysmith, Minocqua, Neillsville, Rice Lake, Stevens Point, Weston, Iron Mountain, Michigan and Marshfield Children's Hospital; Marshfield Clinic Research Institute, Security Health Plan and Marshfield Clinic Health System Foundation.

The Clinic operates several dental clinics in northern, central and western Wisconsin, providing general family dentistry and dental hygiene services to more than 60,000 unique patients per year. These centers were launched through a collaboration including Marshfield Clinic, Family Health Center of Marshfield, Inc., and federal and state agencies, to address the need for dental care in underserved areas. The centers serve all patients regardless of ability to pay or insurance status - uninsured/underinsured, private pay and commercial insurance.

Hospital Overview
Marshfield Medical Center-Neillsville (MMC-Neillsville) is a licensed 25-bed, full service, critical access hospital, located in Neillsville, Wisconsin. MMC-Neillsville, offers a wide range of advanced care services including:

- Over 170 specialties
- Full scope of general and orthopedic surgery services
- 24/7 emergency department
- Inpatient and outpatient physical therapy, rehabilitation and occupational therapy
- Community funded infusion suite with 6 private rooms that provide IV treatments, outpatient and wound care services
- Swing bed program
- Cardiac rehab
- Diabetic education
- 29 clinical exam rooms
- Connected to Marshfield Children’s Hospital, the region’s only dedicated pediatric hospital

**Implementation Strategy Overview**

This Implementation Strategy is specific to Marshfield Medical Center-Neillsville (MMC-Neillsville) and addresses the community health priorities identified through a collaborative Community Health Needs Assessment (CHNA) process. This document outlines the plans for MMC-Neillsville to support specific community improvement efforts.

This plan was reviewed and approved by the authorized governing body, MCHS Hospitals Board, Inc. on February 27, 2023, which is on or before the 15th day of the fifth month after the end of the taxable year the CHNA was completed. Evaluation of the previous Implementation Strategy can be found in the 2022 MMC-Neillsville CHNA report.

**Community Health Needs Assessment Overview**

MMC-Neillsville worked collaboratively with the Clark County Health Department and Aspirus Stanley Hospital to conduct the CHNA.

The MMC-Neillsville CHNA written report includes the process used to conduct the assessment and establish the community health priorities, and describes:

- The community served by the hospital and how it was determined
- Community demographics
- The process and methods used to conduct the assessment, including data and other information used, methods of collection and analyzing information, and cited external source material
- How the hospital accounted input from persons that represent the broad interests of the community
- How data was collected and what types of data were used in the assessment process
- Health priorities and concerns of all population groups, including the medically underserved, low-income, and minority groups
- The identified health priorities of both the community and hospital, including the process and criteria used to identify and prioritize identified needs
- Existing resources in the community available to respond to identified priorities

**Accessing the Full Report**

The written report was completed November 2022, presented to the MCHS Hospitals Board, Inc. for discussion and was adopted on December 8, 2022. The full CHNA report, which details the entire assessment and prioritization process, can be found on [https://www.marshfieldclinic.org/locations/neillsville-marshfield-medical-center/community-health-needs](https://www.marshfieldclinic.org/locations/neillsville-marshfield-medical-center/community-health-needs).
Prioritization Process
Healthy Clark County conducted a virtual community prioritization meeting with stakeholders in January 2022. Eight community organizations were represented at the meeting.

The CBW-Neillsville met in January 2022 to discuss the results of the primary and secondary data and the community prioritization session. Consideration of alignment with the ABCS Community Health Focus Areas of Marshfield Clinic Health System were made. The following criteria were considered:

- How is the county doing compared to the state and national goals?
- Which health priorities have the largest community impact?
- Which health priorities have the most serious impact?
- Is the community ready to change?
- Can these health priorities be changed over a reasonable period of time?
- Are there gaps in county efforts to address the health priority?
- Did the community and county data identify this as a health priority?

At the end of the data review and discussion, stakeholders were instructed to vote for their top two issues. A total of 15 individuals voted and cast two votes each.

Health Priorities
After review of the data, the top community health priorities identified by Marshfield Medical Center in Neillsville are:

- Alcohol and Substance Misuse
- Behavioral Health
- Health Equity

Due to the interconnected nature of these health priorities, a number of health priorities as shown in Table A were combined. However, MMC-Neillsville will continue to support additional community health needs as they arise.

Table A. Health Priority Crosswalk

MMC-Neillsville is committed to improving the overall health and well-being of the communities we serve by strategically focusing on health equity. According to the World Health Organization, health equity implies that everyone should have a fair
opportunity to attain their full health potential and that no one should be disadvantaged from achieving this potential. Therefore, the CBW-Neillsville will focus on improving health equity in our communities by implementing strategies that systematically focus on the social determinants of health and subsequently reduce health disparities.

Identified Health Needs Not Being Addressed
MMC-Neillsville will not address the following health priority identified through the CHNA process as other community organizations are better equipped and have the resources in place to address.
- Communicable Disease

Implementation Strategy
The Implementation Strategy is a part of a community effort to address identified health priorities. Many strategies will be implemented collaboratively with community and Marshfield Clinic Health System partners. Community change is a long-term process that no one organization can accomplish alone; therefore partnerships are essential for success.

Health Priority: Alcohol and Substance Misuse

<table>
<thead>
<tr>
<th>Goal 1: Reduce alcohol and substance use among youth and adolescents by reducing risk and enhancing protection.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strategy</td>
</tr>
<tr>
<td>Support community-wide environmental strategies, prevention and/or policy to address alcohol use and/or substance misuse.</td>
</tr>
</tbody>
</table>

<table>

**Goal 3: Engage in community efforts related to improving equitable access to resources and supports**
Next Steps
This implementation strategy outlines a three-year community health improvement plan. Each year within this timeframe, MMC-Neillsville will:

- Create an annual work plan with specific action steps for that year.
- Set and track annual performance indicators for each strategy, evaluate for effectiveness and areas of improvement.
- Track progress.
- Report progress toward the performance indicators to the hospital board.
- Share actions taken to address the needs with the community at large.

Approval and Community Input
This Implementation Strategy Report was adopted by the MCHS Hospitals Board, Inc. on February 27, 2023.

If you would like to serve on a coalition that helps meet the aims of this report, or have a comment on this assessment, please contact the Marshfield Clinic Health System Center for Community Health Advancement at communityhealth@marshfieldclinic.org or (715) 221-8400.
