

Marshfield Clinic Health System

Occupational health services during COVID-19

We will continue to provide services at Marshfield Clinic Health System that help employers stay compliant with current Federal and State law. We will reschedule all other Occupational Health appointments.

We also will continue to provide onsite occupational health services to employers to maintain safe work places. While onsite, we will follow the employer's workforce protection measures for COVID-19. If an employer does not have measures in place, we will not see persons with respiratory symptoms, will maintain 6-foot distancing as possible, and use personal decision-making capabilities.

We will call patients on the day of appointment prior to being seen in the clinic to screen for respiratory symptoms. If a patient is positive for any respiratory symptoms they will be directed to the 24-hour nurse line at [715-389-5976](tel:715-389-5976) and be rescheduled for no less than 14 days later.

These types of visits will still occur in clinic:

- Audiometry, hearing conversation programs
- DOT drug screens
- Respirator fit testing, PFT's, and medical clearance
- Mine Safety Health Act physicals (pre-placement, monitoring, and termination physicals), police preplacement, Occupational Safety and Health Administration required medical surveillance program physicals(pre-placement, monitoring, and termination physicals)
- Certified Driver Medical Examinations
- Initial Workmen Compensation visits
- Workmen Comp follow-ups for those currently off work
- Marshfield Clinic Health System employees and volunteer Occupational Health services (considered onsite)

We will not see the following visits in clinic:

- Employer requested drug screens mandated by employer policy and not Federal or State law
- Workmen Compensation follow up for those returned to work with restrictions
- Pre-placement exams not under a Federally regulated program

Answers to common questions you may receive from your employees:

- If employees have general questions about COVID-19 and do not have symptoms, please direct them to our Health System patient COVID-19 Helpline at 877-998-0880 or Wisconsin's toll-free helpline at 833-981-0711, or to marshfieldclinic.org. They'll find valuable information about COVID-19, tips for keeping your family healthy and more.
- If employees have a fever or temperature greater than 100 degrees, new cough (within the last day or two) or shortness of breath that is not due to allergies or a chronic condition, and they are concerned that they may have been exposed to COVID-19, please direct them to call our Health System Nurse Line at 1-844-342-6276 before visiting a doctor's office, urgent care, hospital or emergency department.
