

Marshfield Clinic Health System, Inc.

Six physicians working in a rural central Wisconsin city along a major railroad crossing in 1916 came together to form their own practice. A century later, Marshfield Clinic Health System, Inc. (MCHS), was formed in 2014 to govern the expansive system. Today, MCHS entities provide service and care to more than two million Wisconsin residents through over 50 health care centers, a health care plan, an information services company and two hospitals.
