

COVID-19 Travel Policy Information

Travel within and outside of the state continues to be a risk due to community spread of COVID-19 in Wisconsin and a number of other states. As we work together to overcome this crisis, we all have a responsibility to make choices that avoid the potential of severe negative health impact to colleagues, patients and neighbors.

The updated [Travel Return Guidelines](#), provide clarification on conference/CME travel, as well as guidelines and recommendations for travel among MCHS sites, and personal travel. For those with personal travel outside of Wisconsin, the [Travel Screening Survey](#) must be completed and processed appropriately prior to return to work.

More information on recommendations to protect you and others during travel may be found through [Wisconsin Department of Health Services](#) and [Centers for Disease Control and Prevention](#).
