Ambulatory surgery centers (ASCs) are outpatient health care facilities that provide surgical care, including diagnostic and preventive procedures.

Marshfield Clinic has ASCs at its centers in Eau Claire, Marshfield, Minocqua and Wausau.

Comfort and recovery suites, physically connected to an ASC, include a small number of beds for patients who have undergone surgical procedures. In this area, patients have 24-hour access to care and medical staff, including physicians and nurses. Patients will typically spend three to five days recovering from surgery and other procedures completed in the ASC and can rest comfortably in private suite-like rooms with their families.

Details about Clinic centers’ ASCs and comfort and recovery suites follow:
