Director's Discourse

Welcome to the fall edition of *The Scope*.

The Scope is a publication for all of you: residents and fellows, students and all the learners of the Marshfield Clinic Health System. It is a publication to showcase your fellow colleagues and friends in their training programs, as well as to highlight local community events and area attractions.

Residency and fellowship program expansion continues. We are excited to tell you that the ACGME has just approved our new vascular surgery fellowship program! Our first fellow will start July 2024. Dr. Ayman Ahmed will serve as Program Director. Our long-term plan is to expand our graduate medical education portfolio. In July 2022, we matriculated our first cardiology fellows. We hope to start other residency and fellowship programs in the near future.

I'm sure all of you are aware, the Marshfield Clinic Health System and Essentia Health have signed an agreement for a potential merger in the future. This is an exciting opportunity for the health systems to better serve all of our rural communities. This will only strengthen our educational programming. Discussions have already occurred regarding the potential development of new programs in collaboration with Essentia Health.

I would also like to remind you if you are having trouble adjusting to your new role as a brand new intern, or even as an experienced senior resident, or if you are experiencing difficult circumstances, please feel free to contact the Resident Well-Being Committee (RWBC). It is a confidential resource that is available to you.

Welcome to a new academic year at the Marshfield Clinic Health System, and good luck to all of you!

Well-Being Resources for Medical Students, Residents and Fellows

Marshfield Clinic Health System's Resident Well-Being Committee provides free, confidential consultations to medical students, residents and fellows. We host an annual resident/fellow retreat in September to promote wellness and team building. RWBC conducts first-year resident wellness rounding, annual health surveys and offers a website full of useful, practical information to support resident well-being and success. Check out what RWBC offers or request a consultation with our faculty at [this link](#).

ACGME Well-Being Tools and Resources

The ACGME provides an "Improving Physician Well-Being, Restoring Meaning in Medicine" [link](#) for institutions, programs, residents/fellows and faculty members to support and promote well-being in the clinical learning environment.

Additional ACGME wellness resources are available on [this page](#).

MCHS Resident Well-Being Committee is always here to support your training journey. A reminder to review [this site](#) for many helpful wellness resources.

The Best of Marshfield Survey is an annual measure of the best offerings in Marshfield and the surrounding areas. Developed by a Leadership Marshfield class in 2009, this project was designed to increase the awareness of local businesses with area residents and visitors. The public is encouraged to express their opinion by voting for their favorites in Marshfield.

The survey is conducted in April and results are typically announced in May at the Tourism Banquet. Winners in each category receive plaques and bragging rights for the year.

Flu Vaccinations Now Available at Marshfield Clinic Health System

MARSHFIELD – Marshfield Clinic Health System is now offering influenza (flu) vaccinations at all primary care locations throughout Wisconsin.

Influenza, commonly referred to as "flu," is a contagious respiratory illness caused by influenza viruses that infect the nose, throat, and sometimes the lungs. It can cause mild to severe illness, and it is responsible for up to 700,000 hospitalizations and 50,000 deaths each year in the United States. The best way to prevent flu is by getting a flu [vaccine](#) each year. Studies have shown that vaccination reduces the risk of hospitalization and death from influenza.

In the northern hemisphere, most of the time flu activity peaks between December and March, but activity can last as late as May.

"The exact timing and severity of influenza each year in the United States is unpredictable," said Dr. Edward Belongia, an infectious disease epidemiologist at Marshfield Clinic Research Institute. "The virus is constantly changing, which is why it's important to get a flu vaccine every fall."

You should get a flu vaccine before influenza begins spreading in your community. It takes about two weeks after vaccination for antibodies that protect against influenza to develop in the body. CDC recommends that people get a flu vaccine by the end of October for best protection for the influenza season.

As seen on Marshfield Clinic Health System's [Pulse Site](#).

Impact Survey Results—*full story available on Intranet site.*

Thank you for participating in this year's Impact Survey.

Over the course of the next few weeks, managers will share their team's overall scores and itemized questions to see the level of engagement amongst their staff, the strengths, concerns and other takeaways. It's as important as ever to receive the annual influenza vaccine and by October (or sooner), patients can receive theirs.

The Health System's overall scores were lower. There were some positive areas, yet it's clear that concerns remain in some important areas that managers will review with their teams.
