Director's Discourse

Welcome to the new academic year and the fall edition of *The Scope*.

The Scope is for you: residents, fellows, students and all learners of the Marshfield Clinic Health System (MCHS). This Division of Education publication showcases your colleagues, programs, local events and items of potential interest.

I hope everyone had a good summer and found some time to spend with family and friends to recharge. Fall is a great time to be in Wisconsin: leaves are turning color, the weather is cooler and the state birds (mosquitoes) are going away. I welcome all of our new learners! I hope by now you are familiar with the medical campus and city of Marshfield. (By the way, it is a great town to explore on a bicycle.) During your training, I encourage you to take an opportunity to also see some of the other communities that MCHS serves such as Minocqua or Rice Lake. Please enjoy what this beautiful state has to offer.

The COVID pandemic has certainly affected all of us. Last year we were able to readily fulfill all the academic curricular requirements despite the necessary changes as a result of the pandemic. This academic year will likely continue to have adjustments made for safe patient care and to meet all of the training requirements. Thankfully, we now have effective vaccinations. Working together, we can move past this challenge. I would also like to remind you if you are having trouble adjusting to your new role or difficult circumstances, please feel free to contact the Resident Well-Being Committee (RWBC). It is a confidential resource.

Again, welcome to the MCHS, this will be an exciting year!

Well-Being Resources Offered to Residents/Fellows

Marshfield Clinic Health System's Resident Well-Being Committee was formed in 2004 to promote a healthy and humane clinical learning environment for our house staff. RWBC provides a confidential consultation service for residents, an annual retreat to promote wellness and making connections (yes, even during a pandemic), annual health surveys and a website full of useful, practical information to support resident well-being and success. Check out what RWBC offers at [this link](#).

ACGME Well-Being Tools and Resources

In February 2018, the ACGME launched a new, comprehensive [Tools and Resources page](#) for institutions, programs, residents/fellows and faculty members to support and promote well-being in the clinical learning environment.

The ACGME's Task Force on Physician Well-Being Tools and Resources Subcommittee created this collection of materials and other references for residents and faculty members as a resource for well-being and to help identify solutions that best meet local needs.

Please note that the [blue links](#) on the poster (right-hand side of this page) for the RWBC site and the contact email for Dr. Michels are part of an image rather than active hyperlinks.

The Best of Marshfield Survey is an annual measure of the best offerings in Marshfield and the surrounding areas. Developed by a Leadership Marshfield class in 2009, this project was designed to increase the awareness of local businesses with area residents and visitors. The public is encouraged to express their opinion by voting for their favorites in Marshfield.

The survey is conducted in April and results are typically announced in May at the Tourism Banquet. Winners in each category receive plaques and bragging rights for the year.

Marshfield Clinic Health System News Bites

As seen on Marshfield Clinic Health System's Press Release [Internet Site](#):

August 4, 2021

Marshfield Clinic Health System will require its employees to become fully vaccinated for COVID-19 by November 15.

"Our Health System is about serving our Mission and living up to our values. These vaccines are the key to stopping this virus, and it's essential we take this important step in providing the safest possible environment for our patients, families, visitors, providers and staff," said Dr. Susan Turney, CEO of Marshfield Clinic Health System.

Turney added that the decision to mandate was based on the increase in COVID-19 cases in Wisconsin and increased spread of the highly contagious delta variant surging across the nation. In the last two weeks alone, the Health System saw COVID-19 hospitalizations triple, and since the beginning of July, nearly every COVID-19 patient the Health System hospitalized was unvaccinated.

"We did not take this decision lightly. It was one we've been discussing for the past several weeks. But the time has come. In order to be a leader in the community and provide the care our patients deserve, we need to lead by example," Turney said.

Thousands of Health System employees, including nearly 100% of physicians, voluntarily received vaccinations. The Health System continually educates all staff by sharing vaccine resources and giving the opportunity to directly ask leaders and researchers questions through interactive educational sessions that discuss vaccine research, safety and efficacy.

The timing of the Health System's COVID-19 vaccine mandate aligns with its annual required influenza vaccine process.

New public website highlights focus on health equity, diversity and inclusion

As part of the Health System's strategic focus on addressing sources of health inequity in our communities, as well as promoting the values of diversity and inclusion inside and outside our facilities, [a new public-facing website has been launched](#). The site is intended as an introduction to our efforts in HEDI (health equity, diversity and inclusion), from why focusing on these issues is crucial, to progress the System has made already on these fronts.

HEDI is part of our Health System [Quality and Safety First](#) strategic imperative ([QSF1C](#)).

"This is really going to be a hub for everyone to see what we are up to in this area and to hold ourselves accountable for keeping these issues at the forefront of our thinking," said Jess Gaffney, manager of the System's HEDI efforts. "I think having the statements we do on this site from top leaders and providers is also a powerful illustration of our commitment to this work."

The site will be routinely updated as the Health System's HEDI-related work progresses and evolves. If you have questions about the Health System's efforts in this space, [contact Jess Gaffney](#).

Marshfield Clinic is a host site for the Wisconsin Academy for Rural Medicine (WARM) program. In WARM, students spend their last two and half years at Clinic centers in order to complete their training rotations.

WARM is a collaborative effort of the University of Wisconsin School of Medicine and Public Health (UWSPH) and affiliated state campuses like Marshfield Clinic. Collaborators have made WARM a student-centered and innovative rural medical education program much like the traditional M.D. program.

To learn more about WARM, please visit [this site](#).
