

Temporary Visitor Guidelines

This location allows a limited number of visitors or care partners based on the COVID-19 cases in the area. Visitors or care partners are defined as any additional person coming with a patient to an appointment or visiting a patient in the hospital.

Hospital	
Adult patients	One (1) care partner per day. May be a different individual on different dates.
Pediatric and stable NICU patients	Two (2) care partners for the duration of the stay. Must be the same two adults during patient's hospitalization.
Obstetrics Labor and Delivery patients	One (1) care partner for hospital stay.
Emergency, Urgent Care, Walk-in, Medical Offices	
Adult patients	One (1) care partner to accompany patient.
Pediatric patients	Two (2) care partners to accompany patient.

COVID-19 patients

- **Adult patients** who are COVID positive or have COVID-like symptoms and a test pending are not allowed visitors unless there are unique or extenuating circumstances.
- **Pediatric patients** who are COVID positive or have COVID-like symptoms and a test pending are allow one (1) adult care partner or visitor unless there are unique or extenuating circumstances.

Unique or extenuating circumstances

For patients who may be at end of life, the care team will provide guidance on visitation to support patients and families while keeping patients and visitors safe.

Any exceptions to the above restrictions are made by leaders and care teams with the goal of patient and visitor safety, while balancing emotional, mental and other support needs.
